

## Application Developer

### Job brief

We are looking for a qualified Application Developer to design and code functional programs and applications for both desktop and mobile. You will work as part of a team and individually with little supervision and must have excellent knowledge of a LAMP environment and experience of IOS or Android development. You must be familiar with a variety of operating systems and platforms.

The ideal candidate will also have an analytical mindset and a keen eye for detail. The goal is to write “clean” and flawless code to produce fully functional software applications according to requirements.

### Responsibilities

- Understand client requirements and how they translate in application features
- Collaborate with the digital team to set specifications for new applications
- Design creative prototypes according to specifications
- Write high quality source code to program complete applications within deadlines
- Perform unit and integration testing before launch
- Conduct functional and non-functional testing
- Troubleshoot and debug applications
- Evaluate existing applications to reprogram, update and add new features
- Develop technical documents and handbooks to accurately represent application design and code

### Requirements

- Proven experience as application developer
- Experience in designing and building applications
- Ability to work in a predominantly LAMP environment
- Experience with AR technology
- In-depth knowledge of programming for diverse operating systems and platforms using development tools
- Excellent understanding of software design and programming principles
- A team player with excellent communication skills
- Analytical thinking and problem-solving capability
- Great attention to detail and time-management skills
- Experience of IOS or Android development
- Must be able to communicate proficiently in English at Level C1

If you are interested in this role, please send us your CV only in English at:
